

Continuing our Learning at Home - Y1NT and Y1G

Reading	Remember to read with your child every evening. Ask questions as you listen. What happened in the story? Did you expect that? Who were the main characters? Tell me about them. Which is your favourite page? Why?
Mathematics	Practise using the terms <i>more</i> and <i>less</i> . Choose a number and ask your child to tell you '1 more' or '1 less' than that number. Make it more challenging by increasing the number!
A new school year	Now that you have completed your first week in Year One, take some time to think about how you are feeling. What has been fun this week? What has been more challenging than you expected? What have you found easy? What do you want to work hard on over the year? What do you want to get better at? What new things would you like to learn? Have a chat with someone in your family about your hopes for the coming year - can you write down a 'new year's resolution' to share with the class?

Think of a question 1
