

Continuing our Learning at Home - Y21P - Year 2

Writing	Thinking about our topic 'Splendid Skies', can you write a poem about what we have found out? You may want your poem to rhyme, be an acrostic or in the style of a tongue twister or Kenning. Remember to use exciting and interesting words and phrases.
Mathematics	Walk around your house and try to identify as many 2D shapes that you can and describe the number of corners and sides. Can you do the same for 3D shapes? Remember to describe how many faces, edges and vertices (where the edges meet) there are. Can you name the 2D shapes found on each 3D shape?
Religious Education	Think about what you have learned about St Francis. Can you create a picture using different collage materials to show some of the following: brother sun, sister moon, brother wind, sister water, brother fire, sister earth, brother wolf, sister bird? Don't forget to bring it in to show your friends.
